About This Game

Kimmy is a visual novel style game about a summer spent babysitting in late 1960s Massachusetts. You play as Dana, who stumbles across Kimmy--a tiny girl wandering around alone in her neighborhood. Dana decides to take Kimmy under her wing, worried that she's having trouble making friends, and decides to be her babysitter. Let summer begin! Collect trinkets, play street games, and learn more and more about Kimmy and her mysterious family as summer passes by.

Features:

- A dialogue rich story that takes place over the course of 5 acts.
- Over 10 characters to chat with and get to know throughout the story.
- A painterly art-style brings the characters to life, including multiple illustrated cut scenes.
- An intimate story about childhood, honesty and growing up.

Recommendations and Notes

-
- A single play through takes about 2 to 3 hours.
 - Play multiple times to see all of the conversations.
 - Headphones are recommended.

Content warning:

Kimmy is a game about childhood, but it does address some more serious issues and is primarily intended for adults. There are conversations between the characters about things like death, profanities and alcohol. Please consider this before playing this game with younger kids.

\u2665\u2665\u2665\u2665ing \u2665\u2665\u2665\u2665\u2665. This is a turn based, RPG, strategy game that reminds me a lot to warhammer because units can move as with a rule instead of hexes or squares.

The features two campaigns: humans and undead. Each faction has their own good and funny story and conversations. The battles are separated by story pieces, so after each battle you will have some text to read/listen, or you can just skip it if you just want to fight. The upcoming gold version will feature open world as well as story with some other additions so it might be worth getting the other version.

The humans are a faction with a lot of versatility, they have powerful defensive units as well as cavalry and mages, while undead have the necromancer unit which provides a unique game-play, and some cool secrets.

Every unit earn experience points that can be used acquire upgrades and new skills, while heroes can also equip items (You can enable items for all units, tough). The heroes allow you to get other faction units for your army, so you can get very innovative armies.

There are some options to be made and a lot of hidden units and levels, so it has some replayability, aside from different difficulties.

It is a good game with a start and an end, which can sometimes be good because you won't be saving all your money to later".

. This is a neat little VR game. It was fun to explore the apartment to see what I could find and I have to say that I loved Godzilla. That was a nice touch. I'm a bit sad that the TV didn't work and I couldn't start an alien invasion with either the helicopter or the plane. This game also doesn't have very much replay value. Sadly. Having said that though I would recommend this game to other VR players out there. It's only \$6 and offers a fun experience. It's also great to show off when people come to visit as it's a perfect intro to VR game.

<https://www.youtube.com/watch?v=NFOUbjN81YU>. World 1-1 is an amazing video game history documentary movie created by the team made up of Jeanette Garcia and Daryl Rodriguez, two awesome, young but thorough movie makers from Miami. Although World 1-1 automatically might make you think of the world start screen from Super Mario Bros., the film is actually about what I call the rise and fall of the original Atari (I would have probably called the film The Rise and Fall of Atari). The film covers the birth of video games from their origins in scientific labs, onto games being played on what at the time were time-shared supercomputers, to the creation of arcade video game machines, and onto the rise and fall of early video game consoles (video gaming at home).

I really like this game the best out of the three Wildlife Park games. I like that the staff aren't in towers like in WP2. I find it a lot easier to play than the others. I can't really think of much to complain about it. It'd be nice if the paths could be placed in a more straight line or just not be able to be placed near plants, since that always messes things up for me. I've really enjoyed playing the campaigns though. They're challenging, but not enough so that I just get frustrated and never try again. I always struggled with the ones on Zoo Tycoon, but that may have been due to how old I was at the time.

I don't like how the animals get upset by their numbers and that you can't even expand the area to make them happier...or maybe you can and I just don't expand it large enough. Either way, for anyone that likes zoo games and is looking at the Wild Life Park ones, I would recommend this one over the other two. The first one isn't bad, but I really dislike the second one.. Like Machinarium only not depressing. Very fun. Need binoculars or 1000 hours logged in Where's Waldo books. ok.. fun choose your own adventure game. Princess Isabella is a casual hidden object puzzle adventure game that took me about 3 hours to complete.

What struck me most about this game is the excellent voice work. The rest of the game is ok, even if the resolution seems a little low/scaled up in places.

The game uses block letters (caps) throughout, is mildly scary, and looks to be suitable for any age. Because it teaches the clock and musical notation, it could even be considered education; hidden object games exercise the ability to concentrate, and there are some logic puzzles as well.

The game encourages the player to smash vases and other vessels in search of treasure, and it considers snakes and insects evil.

The game delivers what you expect - nothing less, nothing more.. Diamond Dan is a puzzle platformer based more on quick reflexes than logic. You must descend towers of ever-shifting blocks to find a map at the bottom and escape. Sounds simple, but you can be crushed or thrown from the tower, and many of the blocks contain traps such as water or spike pits, projectiles, or enemies living inside the walls who will pull you to your death. Checkpoints are created by opening shortcuts with keys.

Traps can be triggered without harming yourself, if you do it quickly, and doing so rewards you by increasing your multiplier, which adds to the value of any treasure you pick up. Your score at the end of the level is then multiplied based on the difficulty you're playing on. Difficulty affects density of traps and how quickly the blocks shift (it can get insane) and can be changed at will for any level.

You can play as Dan (pushes blocks) or Ann (shatters blocks) on any level and there are separate leaderboards for each. Friend and global leaderboards and tons of achievements.. Jumpix Jump is awful, period. This is one of the worst 3D platformers I have ever played in my life. Jumpix Jump is filled with assets bought from the Unity store. The character file for this 'protagonist' is even an asset from the Unity store itself. The graphics are terrible and aren't even close to looking good. The controls are very buggy and the character even glitches when you jump on a platform. The soundtrack is not even close to being creative since every single song in this game is royalty-free music. The design for all of the levels in this game look like it was put together by a 3 year old. There isn't even any NPCs in this game, nor any enemies in sight. Jumpix Jump is plotless, horrible, very buggy, and it is just an asset-flip galore.
